

NEW!

Perfection for hunting.

Magnusi and Fortis 6 riflescopes.

Magnusi. Excellence, improved.

Outstanding transmission at maximum stray-light suppression for difficult light conditions.

Bright and powerful.

The great strength of the Leica Magnus 2.4-16x56i is its outstanding transmission at maximum stray-light suppression for difficult light conditions. The large front lens diameter, the superior, large exit pupil at low magnification factors and the outstanding light transmission ensure optimum identification from dawn to the last minutes of shooting light. Thanks to these features the Magnus 2.4-16x56i guarantees safe targeting from short distances to accurate long-distance shots.

The benefits at a glance

- greater light yield and larger exit pupil than other premium riflescopes at low magnification factors thanks to low vignetting and 56 mm front lens diameter
- 7x zoom and 2.4-16x magnification range for precise short and long-distance shots
- brilliant, clearly defined illuminated dot
- available with or without Leica's rapid reticle adjustment
- with automatic shut-off for maximum battery life

Riflescope	Leica Magnus 1-6.3 x 24 i	Leica Magnus 1.5-10 x 42 i	Leica Magnus 1.8-12 x 50 i	Leica Magnus 2.4-16 x 56 i
Front lens diameter	24 mm	42 mm	50 mm	56 mm
Magnification range	1-6.3x	1.5-10x	1.8-12x	2.4-16x
Field of view max./min. (100 m)	48.2yds-7.1yds 44m-6.5m	28.4yds-4.5yds 26m-4.1m	24.6yds-4yds 22.5m-3.7m	18.6yds-2.8yds 17m-2.6m
Exit pupil max./min.	0.49-0.15 in/ 12.4-3.8 mm	0.49-0.17 in/ 12.4-4.2 mm	0.49-0.17 in/ 12.4-4.2 mm	0.49-0.14 in/ 12.4-3.5 mm
Parallax free	109.4yds/100 m	109.4yds/100 m	109.4yds/100 m	adjustable, 50 m to infinity
Transmission	92%	92%	92%	92%
Automatic switch-off/ Automatic switch-on	yes	yes	yes	yes
Available reticles	L-4a, L-3D, CDi	L-4a	L-4a, L-Ballistic	L-4a, L-Ballistic

Three good reasons for the Magnus i.

1. Extremely wide field of view

With maximum visibility and extremely broad overview, the outstanding field of view at 1x magnification ensures significantly more safety and hunting success.

2. Easy and intuitive handling.

No matter whether you are wearing gloves or hunting at dusk, the illuminated dot can be operated easily and safely in all situations. Switching from day to night mode in several steps is fast and noiseless.

3. Simplified battery exchange

The worldwide unique battery container is especially user-friendly. It can be opened with one hand, making it easier to exchange the battery quickly.

Optional accessories for Leica riflescopes.

Leica Flip Caps

The new, innovative Leica Flip Caps can be easily installed on the front lenses of the Magnus i or Fortis 6 models to ensure fast and safe protection from dirt and damage. Milled from aluminum, they are extremely robust, reliable and durable.

Leica extra battery container

Simply change the elevation protection cap on your Leica Magnus i or Fortis 6 model with the extra battery container and you always have a second battery at hand. The rugged rubber ensures fast and easy use. More Leica Sport Optics accessories can be found at www.leica-sport-optics.com

Fortis 6. Zoom 6 at its best.

NEW!

The perfect combination of performance and design.

The new standard in the 6x zoom class.

With the new Fortis 6, Leica combines a puristic riflescope design with high optical imaging performance. With a very large exit pupil and an extremely wide field of view at minimum magnification, the Leica Fortis 6 is today the riflescope of the 6x zoom class. The excellent detail recognition and unique image sharpness provide great observation comfort to the last minute. The robust construction makes the Leica Fortis 6 resistant to impacts and falls and guarantees functional reliability in every hunting situation.

The benefits at a glance

- 6x zoom for flexible, versatile hunting possibilities
- extremely wide field of view for safer and faster target identification
- very large exit pupil thanks to special eyepiece design
- fine 4a reticle and clear, round illuminated dot for low degree of target coverage
- puristic design and robust construction

Riflescope	Leica Fortis 6 1-6x 24 i	Leica Fortis 6 2-12x 50 i	Leica Fortis 6 2.5-15x 56 i NEW
Front lens diameter	24 mm	50 mm	56 mm
Magnification range	1-6x	2-12x	2.5-15x
Field of view max./min. (100 m)	48.2yds-7.7yds 44m-7m	22.3yds-3.8yds 20.4m-3.5m	18.6-3yds/ 17m-2.7m
Exit pupil max./min.	0.49-0.16 in/ 12.4-4 mm	0.44-0.16 in/ 11.2-4.1 mm	0.45-0.15 in/ 11.4-3.7 mm
Parallax free	109.4yds/100m	109.4yds/100m	adjustable, 50m to infinity
Transmission	92%	92%	92%
Automatic switch-off/ Automatic switch-on	yes	yes	yes
Available reticles	L-4a	L-4a	L-4a

Three good reasons for the Fortis 6.

1. 6x zoom

The large magnification range allows flexible use in different kinds of hunting.

2. Extremely wide field of view

With maximum visibility and extremely broad overview, the outstanding field of view at 1x magnification ensures significantly more safety and hunting success.

3. Puristic design

The puristic design is especially attractive for hunters, who value timeless understatement with unparalleled perfection.

Leica riflescopes.

Always the better choice.

Leica riflescopes stand for passionate hunting and perfect technology. With the Magnus i and Fortis 6 riflescope series, we have developed target optics that offer the hunter detailed visual experiences – and enable a safe, ethically-placed shot. Leica always puts the needs of hunters first. Innovations never serve their own purpose but are always the result of many discussions and intensive practical exchange. In the categories of 6x and 7x zooms,

Leica riflescopes are setting a new standard. Intuitively operable, systems of lasting value support ethical hunting thanks to sharp image contrasts, natural resolution and unparalleled fields of view. The Leica riflescopes have always combined the best optical performance with state-of-the-art technology. Highest quality that makes the difference and stands the test every day – in every hunting situation, for a lifetime.

Experience performance

that exceeds the highest expectations.

Enlarged exit pupil L-EP (Large Exit Pupil).

The extra large exit pupil of the Leica riflescopes offers the advantage that the eye of the hunter gets a larger movement range, so that hunters can identify their target fast and intuitively. A clear image to the edge facilitates immediate viewing. Thanks to the exclusive eyepiece design of the Leica riflescopes, the exit pupil is 50% larger than in other riflescopes of its class at 1x magnification.

Seeing more with the W-FOW (Wide Field of View).

The wide-angle field of view of the Leica riflescopes offers hunters the greatest possible overview for a safe and ethical shot. It gives hunters more safety, especially at narrow forest aisles and in difficult terrain. Thanks to the unique Leica optical design with a special Barlow lens, the Leica riflescopes of the Fortis 6 and Magnus i range offer an unparalleled 44 m field of view at 1x magnification (at 100 m).

Absolute precision thanks to H-PM (High Performance Mechanics).

As the Leica product design puts emphasis on special durability, the Leica riflescopes are robust companions for every type of hunting. In the development as well as the manufacturing process Leica refrains from using plastic material for any stressed components. In many tests of the international environmental assessment standard DIN ISO 9022 for optical devices, Leica therefore even exceeds the particularly strict demands for professional use – for longer product durability.
