Refined quality: Leica presents a collection of premium leather accessories

Wetzlar, 28 September 2016. Leica Camera AG presents a new collection of elegant leather accessories. The portfolio comprises a notebook case, three different Smartphone slipcasses, two different pen cases and a credit card and business card wallet. Each of the leather accessories is painstakingly crafted and perfectly finished by hand. The use of only the best, finely structured Nappa leather ensures their wonderful looks and a delightful haptic experience. Equally delighting details like subtle contrast stitching in red, the embossed Leica logo on the front and the quality seal 'Handmade in Germany' on the back, lend each item the perfect finishing touches.

The beautifully designed and practical notebook case provides ideal protection for the corresponding Moleskine notebook with subtle Leica branding. The case also offers room for further utensils. For instance, loose notes can be kept safe inside both the front and back of the cover. The case also provides two integrated pockets for credit cards or business cards and two slots for SD memory cards.

The leather slipcasses for the latest iPhone 6 and 7 generations and Huawei P9 and P9 Plus models protect and keep your smartphone safe and sound. The front of each elegant slipcasse also offers three compartments for banknotes, credit cards or business cards. A practical cut-out on the back of the slipcasse makes it easy to slide out the smartphone for use. This feature also allows the smartphone to be recharged without removing it from the slipcasse.

The pen cases, in a choice of styles for one or three pens, are a particularly stylish way to carry writing utensils. The case for one pen can be closed with a tab for more protection.

Pens slip easily into the three separate compartments of the pen case for up to three pens to keep them safe and sound.

The extremely flat card wallet in leather offers pockets for credit cards or business cards on both front and back. The super-slim and elegantly-designed wallet allows its owner to carry up to six cards in exceptional style.

The Leica leather accessories will be available from October in Leica Stores and Boutiques and from selected authorised dealers.
