Leica Sport Optics is offering a new „Travel Package“

Leica APO-Televid, eyepiece and Gitzo tripod as a set

Leica Sport Optics is offering a new “Travel Package” consisting of the Leica APO-Televid 65 W, the Leica Vario-eyepiece 25-50x WW ASPH., the Gitzo tripod and the Gitzo 2-way fluid head. For the customer the purchase of this high-quality bundle means considerable savings on the RSP of each individual item.

The Leica APO-Televid 65 W with angled viewing delivers images with excellent colour fidelity, sharpness and contrast. With an overall length of only 29 cm this spotting scope is especially handy and portable, and at the same time it offers the shortest close focusing limit in its class (2.9 m). Shocks and impacts are effectively absorbed by its robust magnesium-alloy body and rubber armouring.

The state-of-the-art flouride lense guarantees perfect colour fidelity as well as maximum contrast, and the dual-focus system enables fast and precise focusing. Thanks to the AquaDura® coating the lense of the Leica APO-Televid 65 W is extremely water and dirt repellent. In combination with the Leica Vario-eyepiece 25-50x WW ASPH. the customer receives a unique image quality in the entire field of view – without any restrictions and across the whole zoom range.

Weighing only 1.055 kg, the Gitzo GT1545T Traveler carbon fibre tripod of series 1 is an especially compact and light tripod with 4 sections. When folded, the tripod has a length of only 42.5 cm. The Gitzo 2-way fluid head included in the package impresses by its fast and efficient locking system, and at the same time it is particularly lightweight and small. This makes the “Travel Package” the perfect companion for every trip.

The Leica “Travel Package” is now available at a price of 3,045.00 € (RSP) at all Leica Stores and at local specialist retailers.
