Leica M10-P: a new level of understatement

Wetzlar, 21 August 2018. With the Leica M10-P, Leica Camera AG presents a further model in the Leica rangefinder camera segment. Based on the M10, the M10-P offers all the technical advantages of the Leica M rangefinder system and, in details, focuses on the characteristic core features that are particularly appreciated by M-Photographers. Exceptionally discreet and concentrating entirely on the most essential camera functions, the Leica M10-P embodies the essence of the M-Philosophy and raises the traditional understatement of the M-Series to a new and even higher level.

The outstanding features of the Leica M10-P are the extremely low noise level of its shutter and the quietest shutter release of all M-Cameras ever built. This makes it the first digital M-Camera that is even more discreet than its analogue predecessors. The discreet sound of its almost inaudible shutter release makes it the ideal tool for capturing authentic photographs from the heart of life itself – especially in situations where peace and quiet are essential. The design of the Leica M10-P is as discreetly unobtrusive and minimalist as the way of working it supports. The camera has no Leica red dot logo on the front and features only discreet Leica lettering on its top plate. Its hot shoe cover in metal merges seamlessly into the design of the top plate.

With its handling concept, the Leica M10-P fulfils everything that discerning photographers expect from a Leica M and, in this traditional concentration on essential functions, follows the lead of all past and present Leica M-Cameras. A new addition is a touch-function that enables faster checking of the plane of focus in Live-View and Review mode, more convenient browsing in Review mode and faster access to all the most important functions. The M10-P also has an integrated levelling aid that enables perfect orientation of the camera and avoids the need for laborious corrections in postprocessing.

All other features, functions, construction materials and the finishing of the Leica M10-P correspond to the same high standards as those of its sister model, the Leica M10.

The Leica M10-P is available from today and is offered in a choice of black chrome and silver chrome finishes.

TECHNICAL DATA

Camera name:	Leica M10-P
Camera type:	Digital camera with rangefinder system
Lens mount:	Leica M bayonet
Compatible lenses:	Leica M lenses, Leica R lenses via adapter
Sensor:	CMOS chip, active surface approx. 24 x 36 mm
Storage media:	SD cards 1-2 GB / SDHC cards up to 32 GB / SDXC cards up to 2 TB
Viewfinder:	Large, bright-line frame rangefinder and automatic parallax compensation
LCD panel:	3" TFT LCD, 1.04 MP, touch control available
Power supply (Leica BP-SCL5):	1 lithium-ion rechargeable battery, rated voltage 7.4 V; capacity 1100 mAh, max. charging voltage/current: 1000 mA DC, 7.4 V; operating conditions (in the camera): +0 to +40°C; manufacturer: PT. VARTA Microbattery, Made in Indonesia
Charger (Leica BC-SCL5):	Inputs: 100-240 VAC, 50/60 Hz, 300 mA with automatic switch-over or 12 VDC, 1.3 A, output: DC, rated voltage 7.4 V, 1000 mA / max. 8.25 V, 1100 mA, operating conditions: +10 to +35°C, manufacturer: Guangdong PISEN Electronics Co. Ltd., Made in China
Housing:	Full metal housing: Magnesium die-cast, synthetic leather covering Top cover and bottom cover: Brass, black or silver chrome-plated finish
Dimensions (WxHxD):	139 x 38.5 x 80 mm
Weight:	approx. 675 g (with battery)
