July 2019

Leica Fortis 6 2.5-15 x 56i Perfection in the 6x zoom class

Leica Sport Optics (Wetzlar, Germany) expands the successful Leica Fortis 6 series with another riflescope: the Fortis 6 2.5-15 x 56i. The perfect combination of high optical imaging performance and sleek design makes the Fortis 6 2.5-15 x 56i unique among riflescopes with 6x zoom and a 56-mm lens diameter.

With the Fortis 6 riflescopes, Leica combines a puristic riflescope design with outstanding optical quality. The new Leica Fortis 6 2.5-15 x 56i complements the Leica Fortis 6 1-6x24i and 2-12x50i already introduced at IWA 2019.

Outstanding detail recognition, a wide field of view, and unique contrast deliver exceptional viewing comfort – from dawn to dusk. With a very large exit pupil at minimum magnification and an enormous field of view at 2.5x magnification, the Leica Fortis 6 riflescopes are now setting new standards in the 6x zoom class.

Like the 24 and 50 models, the Fortis 6 2.5-15 x 56i features a rugged construction that makes the riflescope resistant to shocks and falls. This ensures functional reliability in every hunting situation. Thanks to the generous range of magnifications, it is ideal for versatile use in a wide variety of hunting situations. And the superior, large exit pupil offers even more safety for fast target acquisition.

The benefits at a glance:

- outstanding light transmission and high-contrast imaging performance
- 6x zoom for flexible, diverse hunting options
- W-FoV – wide field of view for best possible overview and safety
- L-EP – very large exit pupil for viewing comfort and fast aim
- H-PM – absolutely precise and reliable mechanics, made entirely of metal
- sleek riflescope design
- extra-large magnification range
- rugged and wear-resistant

Recommended retail prices (incl. VAT):

Leica Fortis 6 1-6x24i: from € 1,695

Leica Fortis 6 2-12x 50i: from € 1,995

Leica Fortis 6 2.5-15 x 56i: from € 2,245
